Test Case for Deleting an Article

This test case details the steps as well as expected results when deleting an article in Communifire. Articles can be used for managing press releases, news or other similar types of content.

Scenario SC1: Delete an article

Preconditions:

- PR1. Make sure that the user deleting an article has the required *Delete* permission (*Control panel -> Content drop-down -> Articles -> Permissions*).
- PR2. User deleting content should be logged in. Guests cannot delete content.
- PR3. Workflows (in the space or top level community where the article has to be edited) are disabled.
- PR4. Points are set for creating an article (*Control panel -> People -> Points*).

Test steps:

- TS1. Open the Communifire application in browser. Login using your credentials.
- TS2. On the *My Articles* page (accessed from *My Content - Articles* on left side bar, under *My Account* page), select an article you want to delete or click on the *Gear* icon on the right and select *Delete*.
- TS3. A pop-up message will be displayed - *Delete this content?*.
- TS4. Press *Yes* button to delete the article.

Expected results:

- ER1. The article should be deleted from *Articles list* page.
- ER2. The article should be deleted from *My Articles* page.
- ER3. The deleted article should not come up in search results after searching for keyword(s) taken from the title, body, summary and category of the article.
- ER4. The deleted article should not be visible in *Activity ticker* and *Activity stream*.
- ER5. The author's points should get reduced on deleting an article.
- ER6. The comments from the deleted article should be deleted.
- ER7. The comments from the deleted article should not be searchable.
- ER8. All article's comments should be deleted that are in workflow pending approval on deleting an article.

Scenario SC2: Cancel deleting an article

Preconditions:

- PR1. Make sure that the user deleting an article has the required *Delete* permission (*Control panel -> Content drop-down -> Articles -> Permissions*).
- PR2. User deleting content should be logged in. Guests cannot delete content.

PR3. Workflows (in the space or top level community where the article has to be edited) are disabled.

Test steps:

TS1. Open the Communifire application in browser. Login using your credentials.

TS2. On the *My Articles* page (accessed from *My Content - Articles* on left sidebar, under *My Account* page), select an article you want to delete or click on the *Gear* icon on the right and select *Delete*.

TS3. A pop-up message will be displayed - *Delete this content?*.

TS4. Press *No* button to cancel deleting an article.

Expected results:

ER1. The article should not be deleted from *Articles list* page.

ER2. The article should not be deleted from *My Articles* page.

Scenario SC3: A user can delete article created by other users

Preconditions:

PR1. Make sure that the user has required permissions *Delete All Articles* to delete an article for someone else (*Control panel -> Content drop-down -> Articles -> Permissions*).

PR2. User deleting content should be logged in. Guests cannot delete content.

PR3. Workflows (in the space or top level community where the article has to be edited) are disabled.

PR4. Points are set for creating an article (*Control panel -> People -> Points*).

Test steps:

TS1. Open the Communifire application in browser. Login using your credentials.

TS2. Click *Browse* from the header menu and select *Articles* from drop-down list. Click an article you want to delete, and click on the *Gear* icon on the right and select *Delete*.

TS3. A pop-up message will be displayed - *Delete this content?*.

TS4. Press *Yes* button to delete the article.

Expected results:

ER1. The user should be able to delete other user's article.

ER2. The article should be deleted from *Articles list* page.

ER3. The deleted article should not come up in search results after searching for keyword(s) taken from the title, body, summary and category of the article.

ER4. The deleted article should not be visible in *Activity ticker* and *Activity stream*.

ER5. The author's points should get reduced on deleting an article.

ER6. The comments from deleted article should be deleted.

ER7. The comments from deleted article should not be searchable.

ER8. All article's comments should be deleted that are in workflow pending approval on deleting an article.

Scenario SC4: Cancel deleting an article created by other users

Preconditions:

PR1. Make sure that the user has required permissions *Delete All Articles* to delete an article for someone else (*Control panel -> Content drop-down -> Articles -> Permissions*).

PR2. User deleting content should be logged in. Guests cannot delete content.

PR3. Workflows (in the space or top level community where the article has to be edited) are disabled.

Test steps:

- TS1. Open the Communifire application in browser. Login using your credentials.
- TS2. Click *Browse* from the header menu and select *Articles* from drop-down list. Click an article you want to delete, and click on the *Gear* icon on the right and select *Delete*.
- TS3. A pop-up message will be displayed - *Delete this content?*.
- TS4. Press *No* button to cancel deleting an article.

Expected results:

- ER1. The article should not be deleted from *Articles list* page.

Scenario SC5: Deleting an article with multi-step workflow enabled**Preconditions:**

- PR1. Make sure that the user deleting an article has the required *Delete* permission (*Control panel* -> *Content* drop-down -> *Articles* -> *Permissions*).
- PR2. User deleting content should be logged in. Guests cannot delete content.
- PR3. Workflows (in the space or top level community where the article has to be edited) are enabled.

Test steps:

- TS1. Open the Communifire application in browser. Login using your credentials.
- TS2. On the *My Articles* page (accessed from *My Content* - *Articles* on left side bar, under *My Account* page), select an article you want to delete or click on the *Gear* icon on the right and select *Delete*.
- TS3. A pop-up message will be displayed - *Delete this content?*.
- TS4. (a) Press *Yes* button to delete the article.
(b) Press *No* button to cancel deleting an article.

Expected results:

- ER1. If the author deletes the article while the article is in the 1st or 2nd step of a three-step workflow, then the article should be removed from pending workflow.
- ER2. If the author selects *No* while the article is in the 1st or 2nd step of a three-step workflow, then the article should remain in pending workflow queue.

Scenario SC1: Delete ghostwritten article**Preconditions:**

- PR1. Make sure that the user deleting an article has the required *Delete* permission (*Control panel* -> *Content* drop-down -> *Articles* -> *Permissions*).
- PR2. User deleting content should be logged in. Guests cannot delete content.
- PR3. Workflows (in the space or top level community where the article has to be edited) are disabled.
- PR4. Points are set for creating an article (*Control panel* -> *People* -> *Points*).

Test steps:

- TS1. Open the Communifire application in browser. Login using your credentials.
- TS2. On the *My Articles* page (accessed from *My Content* - *Articles* on left side bar, under *My Account* page), select an article you want to delete or click on the *Gear* icon on the right and select *Delete*.
- TS3. A pop-up message will be displayed - *Delete this content?*.
- TS4. Press *Yes* button to delete the article.

Expected results:

ER1. The article should be deleted from *Articles list* page.

ER2. The article should be deleted from *My Articles* page.

ER3. The deleted article should not come up in search results after searching for keyword(s) taken from the title, body, summary and category of the article.

ER4. The deleted article should not be visible in *Activity ticker* and *Activity stream*.

ER5. The selected author's points should get reduced on deleting an article.

ER6. The comments from the deleted article should be deleted.

ER7. The comments from the deleted article should not be searchable.

ER8. All article's comments should be deleted that are in workflow pending approval on deleting an article.
