

New Enhancements

Version 15

Published 17/1/2019 3:57 AM by [Grace Kamau](#) Last updated 3/12/2019 2:23 AM by [Grace Kamau](#)

If you're curious about what's new in Communifire—and what's changed—you're in the right place.

The Axero team adds features to Communifire each month. Below is a list of new features added or enhanced that are available in the latest release of Communifire. To make sure your site is updated with these new features, request a site [update here](#).

November 2019

- Added date and space filters to [Search Analytics](#)
- Added [Manage Space: Search Analytics](#)
- Updated tags in [Tag Groups](#) to sort alphabetically
- Fixed an issue related to uploading images
- Fixed a bug where the last updated by user on content is incorrect
- Added [Page Builder](#) pages to quick [Search](#) results
- New APIs:
 - [REST API: Read Notifications](#)
 - [REST API: Get Announcements](#)
 - [REST API: Add Tags](#)
 - [REST API: Create Custom Notification](#)

October 2019

- Released the [Communifire Browser Extension](#) that shares external links in Communifire
- Fixed a bug where some [User Section Permissions](#) clear after saving permissions
- Fixed a bug where a user can't view another user's private profile when they are [Connections](#)
- Fixed a bug where [Audience Overview](#) analytics display the same data for different date ranges
- Fixed a bug where a large image can't be uploaded as a featured image on mobile
- Fixed a bug where pending and banned users don't appear in a [People Widget](#) when configured to display pending or banned users
- Fixed a bug where a space wall post comment [Notifications](#) URL is incorrect
- Fixed a bug where a [Manage Space: Dynamic Properties](#) announcement doesn't send notifications to space members
- Fixed a bug where resources can't be inserted in the [Page Builder](#) editor using Internet Explorer
- Updated the [Preferences](#) page to apply default values for time zone, date format, and time format so users are not prompted to set preferences on their first login
- Updated the phone number field on [User Profiles](#) to be a clickable link
- Added [Page Builder](#) pages to [Search](#)
- Fixed a bug related to syncing [Azure AD SSO](#) users
- Added location / [Event Resources](#) syncing to [Outlook 365 Calendar Sync](#)
- Added a button to send the [Weekly Digest Email](#) and [Daily Digest Email](#) to individual users on the [Edit Email Template](#) page

September 2019

- Fixed a bug where the [Tag Cloud Widget](#) doesn't sort by tag count correctly
- Fixed a bug where content by other users appears in the profile of a user with a period in their username
- Fixed a bug where users don't appear in the [Space People](#) page after [Bulk Import Users](#)
- Updated the [Weekly Digest Email](#) to show no image instead of showing the placeholder image when content doesn't have a featured image
- Added attachment and inline image syncing for [Outlook 365 Calendar Sync](#)
- Added right-to-left text functionality
- Fixed a bug where the event date changes when a user in a different time zone from the event creator tries to edit an all day event
- Fixed a bug with updating the profile photo
- Fixed a bug where a user can't update [My Tasks](#) status when a task is assigned to another user
- Fixed a bug where [Discussions](#) forum tabs become unresponsive after clicking through them
- Fixed a bug where default [Task Permissions](#) are not copied when a space is copied
- Fixed a bug where a forum and its discussion posts appear on the space discussions homepage without permissions for that forum
- Fixed a bug where new [Files](#) don't populate in the [Weekly Digest Email](#)
- Fixed a bug where the [Cases](#) recipients list disappears after scrolling through it
- Fixed a bug where the assigned user doesn't receive an email notification when a comment is added to a case
- Fixed permission bugs related to the [Weekly Digest Email](#)
- Added the system property EditorToolbarAdditionalOptions that adds options to the rich text editor toolbar

August 2019

- Fixed a bug where clicking a "User added you as a follower on a task" notification doesn't open the task in the space
- Fixed a bug where [@Mentions](#) in a wall post don't generate [Notifications](#) for the mentioned user
- Fixed a bug related to editing a ghostwritten draft
- Fixed a bug where "Updated by" displays the file author instead of the user who updated the file
- Fixed a bug where last activity date and last login are blank in the file from [Download CSV File of Users](#)
- Fixed a bug where [Dynamic Properties](#) and [Manage Space: Dynamic Properties](#) do not populate in the "choose a property" dropdown for the [Dynamic Property Widget](#)
- Fixed a bug where a user can't update the task status of [My Tasks](#) created by another user and assigned to them
- Fixed a bug where a user can't edit their own photos when [Photos](#) are set to Only in Spaces
- Fixed a bug where a username is autofilled in the search bar on some pages
- Fixed an [Outlook 365 Calendar Sync](#) issue
- Fixed an issue where featured images appear blurry
- [System Properties](#) added:
 - AllowedIndexableFileFormats: File formats that are allowed to be indexed
 - SetWikiIndexAsDefaultWikiLandingPage added: Sets the wiki index as the wiki landing page
- Added a space URL mnemonic for the [Weekly Digest Email](#)
- Added a [Ghostwrite Content](#) feature where users can publish content for other users
- Fixed an issue where the video player is huge for portrait [Videos](#)
- Fixed a bug where users don't appear in the [Cases](#) add recipients list when there are many users in the space
- Fixed duplicate [Space Activity Stream](#) posts appearing for a wall post with an attached image
- Updated the [Tasks](#) page to show recently closed tasks at the top of the list
- Updated the [Tasks](#) page to show new tasks at the top of the list
- Added a [Manage Space: System Properties](#) page

July 2019

- Fixed a bug where a [Content List Widget](#) filtered by cases and tags doesn't apply the tag filter
- Fixed a bug where MP3 files do not play in Safari 12.1.1
- Fixed an issue where a birthdays and anniversaries [People Widget](#) displaying a lot of items produces an exception
- Fixed a bug where the search icon in [Browse People](#) doesn't toggle search filters in a mobile browser
- Fixed a bug where a user without Case > Create and Edit permissions can't view [Cases](#)
- Fixed a bug where [Manage Space: Join Requests](#) can't be approved
- Added the video player for video files added to the [Files](#) section
- Fixed a bug with [Add People to Space](#)
- Updated the video player — jump forward/back, playback speed, mini player features now available
- Fixed a bug where an event location in non-Latin characters does not display correctly on the event page
- Updated the event location functionality to create a link when the event location is a map link
- Fixed a bug where the [Files](#) list does not load after a certain number of files are added to a folder
- Fixed a bug where a space admin can't edit another user's photo when [Photos](#) are set to Only in Spaces
- Fixed a bug where long file names overrun the [Files](#) list container
- Fixed a bug where [Export as PDF](#) does not work in Safari
- Fixed a bug related to removing users from a chat in [Chat & Instant Messenger](#)
- Fixed a bug where the save button in the image uploader is not visible in a mobile browser
- Fixed a bug where the [Organizational Chart](#) breaks after deleting the org chart leader user
- Fixed a bug where images uploaded from an iPhone become upside down
- Added Activity Stream image preview for images added in the [Files](#) section
- Added Activity Stream preview for [Videos](#) added from YouTube and Vimeo
